Projects

Ultraedit Clone

https://mohit7386.github.io/WEB-Development/Source%20Code/Project-4_Clone_Ultraedit.html 09/2023 - 09/2023

This is the UI of Ultraedit Clone build with HTML and CSS working with all the links , images , animations , hovering etc. Using CSS tech - flexbox , grid etc.

Netflix Clone

https://mohit7386.github.io/WEB-Development/Source%20Code/Project_Netflix_Clone/index.html 07/2023 - 07/2023

This project recreates the Netflix India homepage using HTML and CSS. CSS styles the layout, fonts, and colors to closely match Netflix's design, utilizing Google Fonts and media queries for responsiveness.

Calculator Web App

https://mohit7386.github.io/Web-Development/Source%20Code/Project-7_Calculator/index.html 10/2023 - 10/2023

Modern Calculator is a web application which is user-friendly tool designed for performing basic arithmetic operations. It features a sleek, dark-themed interface built with HTML, CSS, and JavaScript. The display area dynamically shows user inputs and calculation results, with buttons styled to enhance the visual experience and provide feedback through hover effects.

To do list App

<https://mohit7386.github.io/Web-Development/Source%20Code/Project%205/todo%20list/index.html> 12/2023 - 12/2023

To-Do List web application is a simple and efficient tool designed to help users manage their tasks effectively. Built using HTML, CSS, and JavaScript, this app offers a clean and intuitive interface where users can easily add, edit, and delete tasks. Each task entered is displayed in a list format, with options to mark tasks as completed or remove them once done.

Digital Clock Using Java Swing

https://mohit7386.github.io/CodingIn_Java/Java%20Projects/Project_Digital_Clock.java 04/2023 - 04/2023

In this project, we will show how to use the Java Swing library to build a digital clock. This digital clock uses a graphical user interface(GUI) to display current date and time. This clock is build using the Java Swing library, which provides a flexible set of components for creating a graphical user interface(GUI). This application has an easy and simple design with Labels to show current date and time.

Pizza Shop

<https://mohit7386.github.io/Web-Development/Source%20Code/Project6/Pizza%20Shop/index.html> 03/2024 - 03/2024

Creating a responsive pizza shop website using HTML, CSS, and JavaScript, you can offer your customers an easy and efficient way to order and pay for their favorite pizzas. You can also visit our email in case of any query. Interactive UI and loads with smooth transition and very efficient to use.
